

Listing of the Claims:

1. (Previously presented) A method for managing telecommunication bills for a subscriber, the method comprising the steps of:

conducting an analysis of a subscriber's telecommunication predicted usage requirements and historical usage;

creating a report to correspond to the subscriber's predicted usage requirements and historical usage;

selecting at least one telecommunication carrier plan to conform to the predicted usage requirements and the historical usage;

receiving a subsequent bill from the carrier corresponding to the subscriber's actual telecommunication usage and containing an actual billed amount;

comparing the actual usage to the predicted usage requirements to identify differences between the actual usage and the predicted usage requirements and to identify instances in which such differences result in additional or unexpected charges;

determining an anticipated billed amount based on the actual usage;

comparing the anticipated billed amount to the actual billed amount to identify billing errors in the bill; and

creating an actual report for the subscriber.

2. (Cancelled)

3. (Previously presented) The method as described in claim 1, comprising:

requesting billing credit from the carrier in the amount of the identified errors;

reviewing a further subsequent bill from the carrier to insure that credit was posted to the subscriber account.

4. (Original) The method as described in claim 1, wherein the method is performed on a periodic basis corresponding to the generation of bills by the carrier.

5. (Previously presented) The method as described in claim 1, further comprising:
identifying a new telecommunication carrier plan;
comparing both the selected carrier plan and the new carrier plan to the predicted usage requirements, the historical usage, and the actual usage;
deciding whether the new carrier plan better conforms to the subscriber's predicted usage requirements, historical usage, and actual usage.

6. (Original) The method as described in claim 1, wherein the subscriber comprises a plurality of telecommunication users.

7. (Previously presented) The method as described in claim 1, wherein the step of selecting a telecommunication carrier plan to correspond to the predicted usage requirements and the historical usage comprises selecting a plurality of telecommunication carrier plans to correspond to the predicted usage requirements and the historical usage.

8. (Previously presented) The method as described in claim 7, wherein the plurality of plans is provided by a plurality of plan carriers.

9. (Previously presented) The method as described in claim 1, wherein the analysis of a subscriber's telecommunication predicted usage requirements and historical usage includes identifying and suggesting a plurality of carrier options and plans.

10. (Previously presented) The method as described in claim 6, wherein the analysis of a subscriber's telecommunication predicted usage requirements and historical usage corresponds to a plurality of telecommunication users and usage requirements for each user.

11. (Previously presented) The method as described in claim 10, wherein the analysis further includes calling patterns of each user, coverage requirements for each user, and feature needs of each user.

12. (Previously presented) The method as described in claim 10, wherein the analysis further includes organizational departmentalization for each user.
